STUDIO APARTMENT

A REFINED MODERN APARTMENT BLENDING SOFT CURVES, WARM TEXTURES, AND UNDERSTATED LUXURY.

By: Priyanshi Mathur

 # ASSIGNMENT 23

INTRODUCTION

Designed as a seamless blend of function and elegance, this apartment emphasizes spatial flow and visual connectivity. Soft curves, warm wooden accents, and thoughtfully integrated lighting define the interiors, while each zone transitions organically, creating a cohesive and immersive living experience.

This apartment reflects a modern luxury lifestyle, combining clean lines with soft, organic forms. A neutral palette enriched with warm wood finishes and statement elements creates a calm yet expressive environment that feels both sophisticated and lived-in.

FLOOR PLANS

SECTIONS

In this project, I have developed four different studio apartment floor plan options by exploring various spatial layouts and furniture arrangements. Each option was designed keeping in mind functionality, circulation, natural light, and efficient use of space.

After analyzing all four alternatives, I selected the fourth plan as the final design. This plan is highlighted as the “Selected Plan” in the drawing because it offers the most balanced and practical layout among all options.

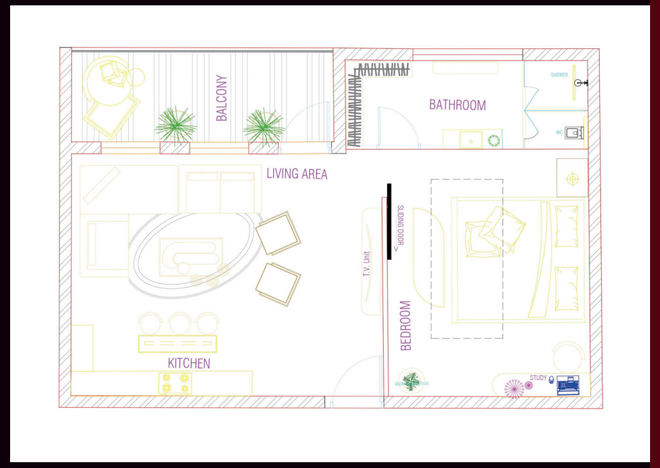
SCALE : 1:50

OTHER FLOOR PLANS

BRIEF EXPLANATION



PLAN 1

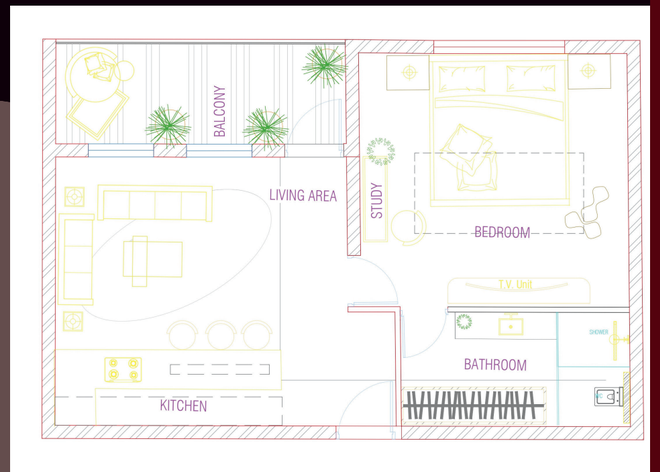
Plan 1

The first floor plan focuses on a more open studio layout, where the living, sleeping, and kitchen areas are visually connected. While this option creates a spacious feel, it offers less privacy for the bedroom, which was a limitation for daily living.

PLAN 2

Plan 2

The second plan explores stronger zoning by partially separating the bedroom from the living area. This improves privacy compared to Plan 1; however, the circulation becomes slightly restricted, and the entry experience is less defined.



PLAN 3

Plan 3

The third plan emphasizes compact planning and furniture-based divisions. Although the space utilization is efficient, the layout feels comparatively tighter, and the entry does not create a strong visual or functional impact.

DESCRIPTION

THE SELECTED PLAN

Entry Area (with Bookshelf Feature)

The entry of the apartment is carefully designed to create a warm, welcoming, and aesthetically pleasing first impression.
A bookshelf is placed at the entrance, which acts as a soft partition between the entry and the main living space.

This bookshelf:

Creates a visual buffer instead of a solid wall
Enhances the aesthetic appeal of the entry
Adds functional storage and display space
Makes the entry feel inviting and personalized
By using a bookshelf rather than a wall, the design maintains openness while still defining the entry zone clearly.

Living Area

The living area is positioned centrally and connects seamlessly with the entry. It functions as the main activity space of the apartment and benefits from the open layout created by the bookshelf partition. This arrangement improves spatial flow and visual continuity, making the studio feel larger and more comfortable.

Kitchen Area

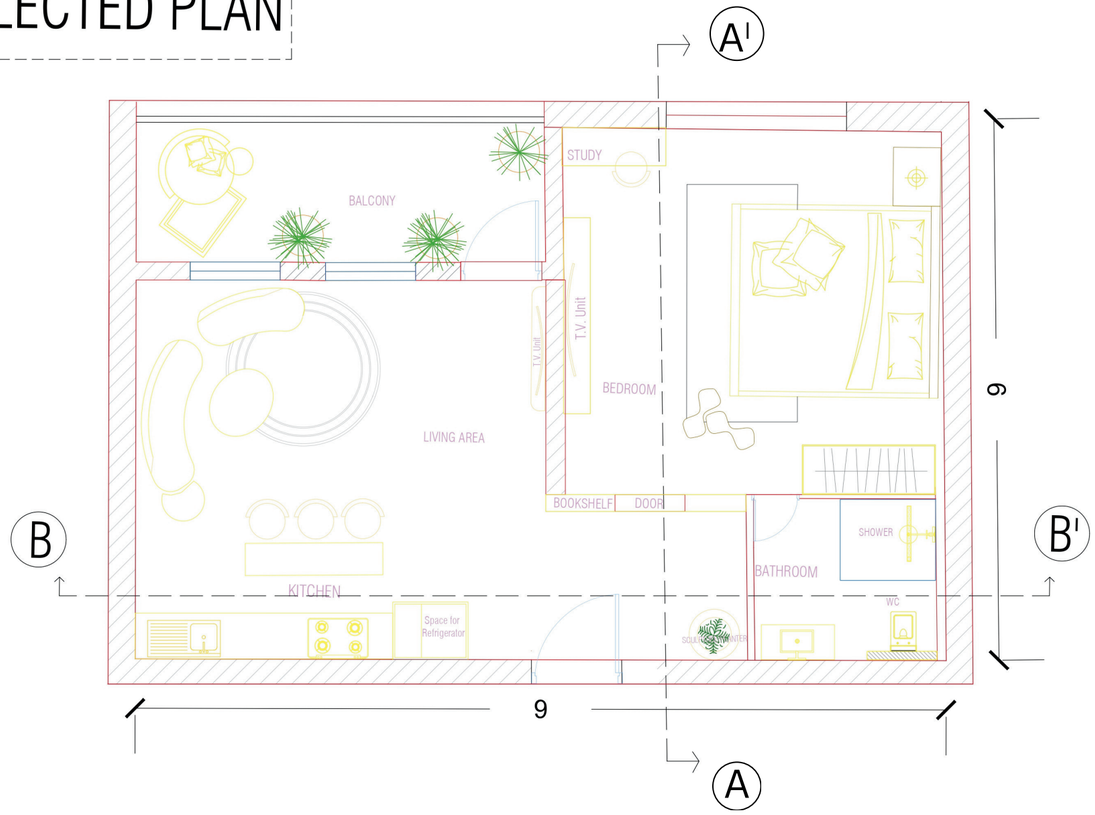
The kitchen is planned as a compact and efficient unit adjacent to the living area. Its placement allows for easy access while maintaining a clean and organized layout. Adequate counter space and storage ensure functionality without overcrowding the apartment.

Bedroom Area

The bedroom is located in a more private zone of the apartment. It is visually and functionally separated from the living area, providing comfort and privacy while still maintaining connectivity within the studio layout.

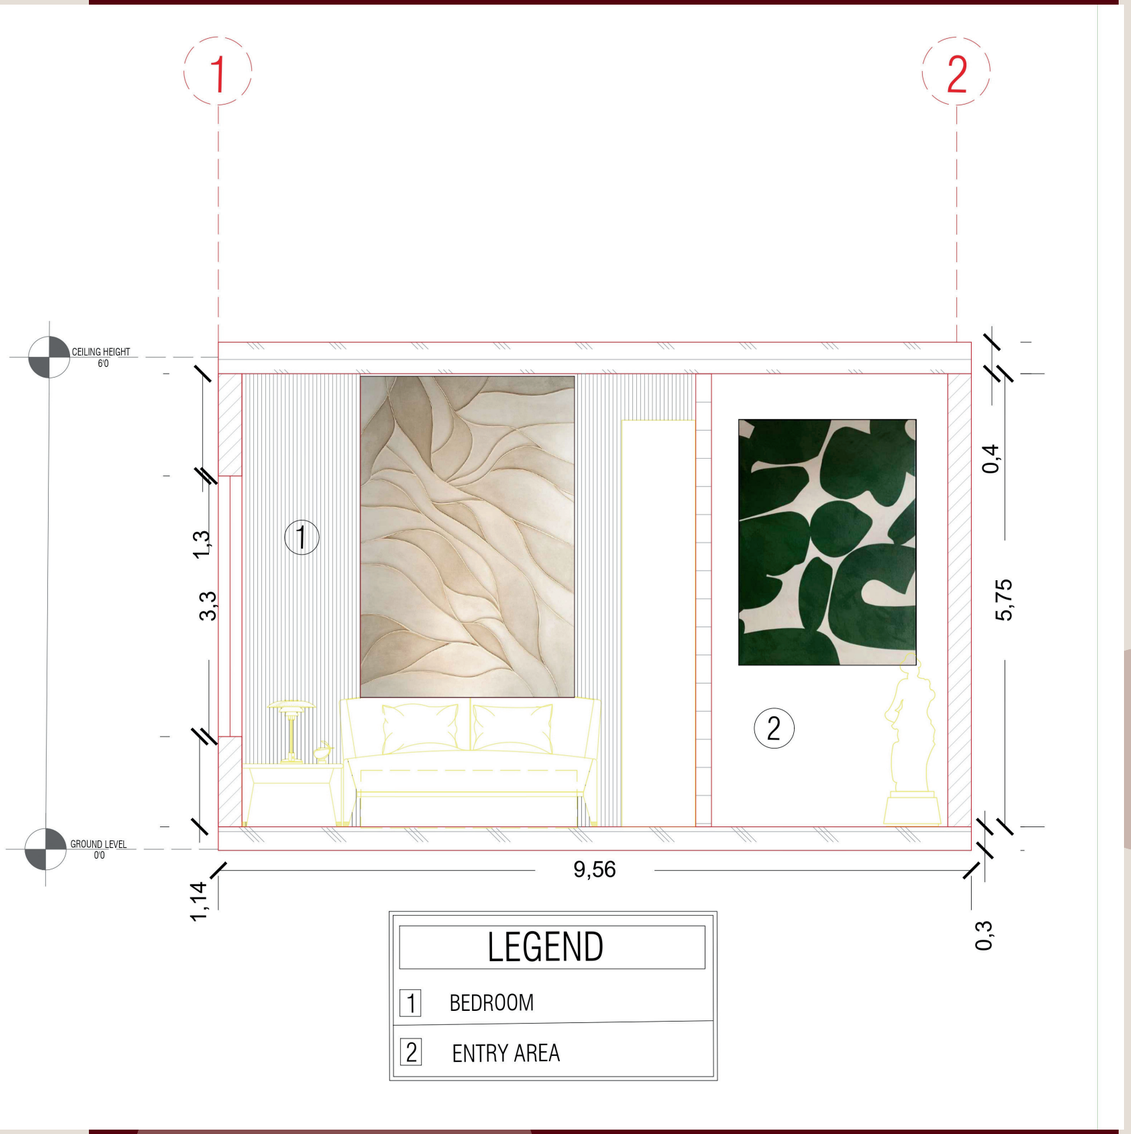
After exploring four different layout options, the fourth plan was selected as the final design because it provides the most efficient spatial planning, smooth circulation, and a well-defined entry experience.
The studio apartment is planned as a compact yet visually rich space, where each function is clearly defined while maintaining openness.

SELECTED PLAN



SECTIONS

This section represents a vertical cut through the selected studio apartment, clearly showing the bedroom and the entry area along with their spatial proportions and design elements.



This sectional view helps in understanding how the bedroom and entry area function vertically, highlighting comfort, privacy, and design detailing. It also emphasizes how the bookshelf at the entry enhances both functionality and aesthetics, making the entry space warm and inviting.

Bedroom Area (1)

The bedroom is shown on the left side of the section. It is designed as a comfortable and private sleeping space with well-defined vertical proportions.

The bed placement is highlighted along the wall, allowing efficient use of the floor area.

A designed backdrop wall is provided behind the bed, enhancing the visual appeal and giving a focal point to the bedroom.

Vertical wall paneling is used, which adds height perception and texture to the space.

The ceiling height is maintained uniformly to ensure comfort and a spacious feel.

Entry Area (2)

The entry area is shown on the right side of the section and is treated as an important transitional space rather than just a passage.

The bookshelf at the entry is visible in section, acting as a functional partition between the entry and the internal spaces.

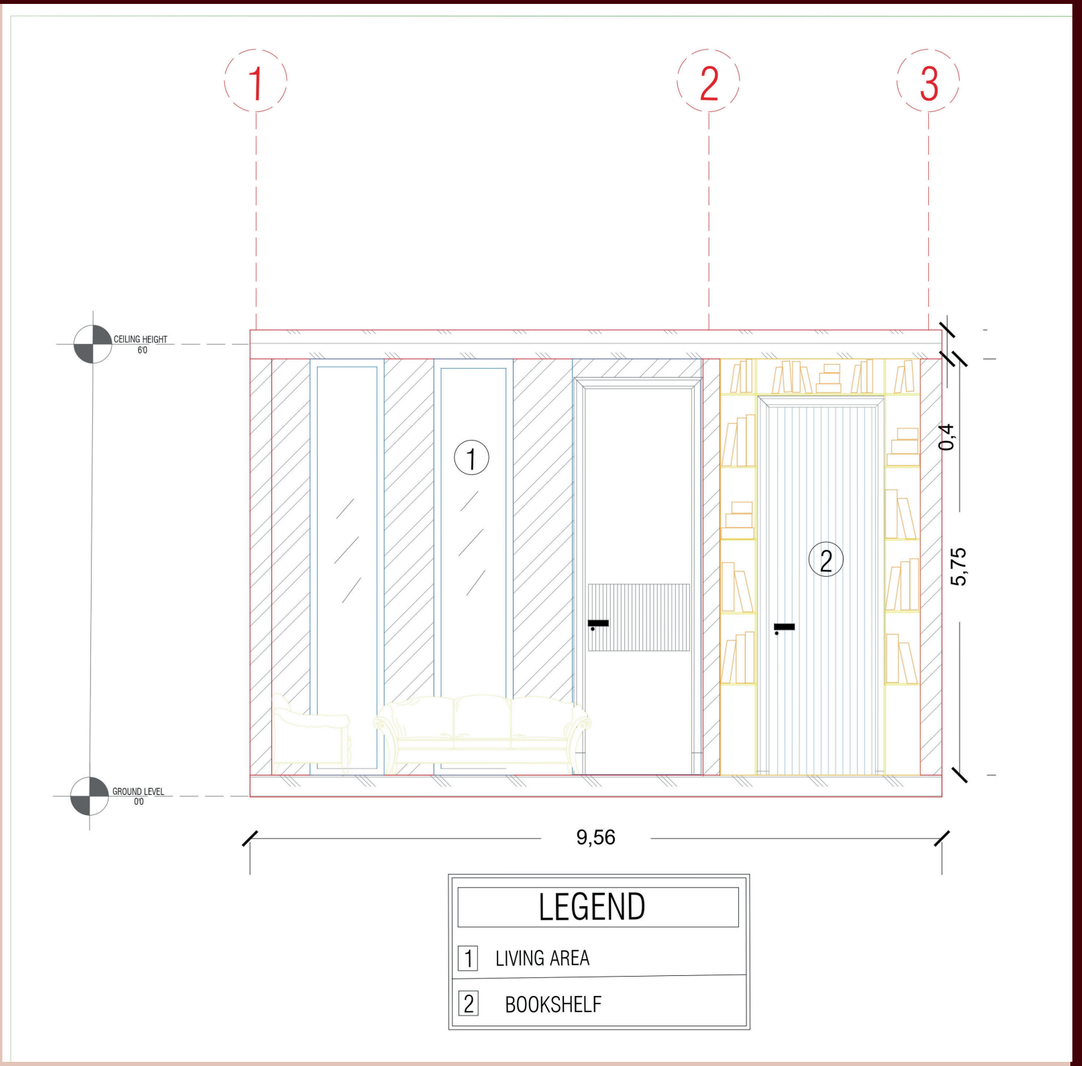
This bookshelf creates a welcoming and visually interesting entry, while also providing storage and display.

The open nature of the partition allows light and visual connection, preventing the space from feeling enclosed.

This section represents a vertical cut through the living area and the entrance zone, clearly explaining the spatial relationship between the main living space and the bookshelf element.

Living Area (1)

The living area is shown on the left side of the section and is designed as an open, comfortable, and visually light space.
The sofa placement along the wall allows clear circulation through the space.
Tall vertical openings and wall treatments enhance the sense of height and openness.
Minimal wall partitions are used, ensuring the living area feels connected to the rest of the studio apartment.
The uniform ceiling height contributes to a balanced and spacious proportion within the compact layout.



This sectional view explains how the living area connects with the entry through the bookshelf, demonstrating an intelligent use of furniture as an architectural element. It highlights how the design achieves openness, functionality, and visual interest within a compact studio apartment.

Bookshelf at Entry (2)

On the right side of the section, the bookshelf is highlighted as a key design element.
The bookshelf extends vertically, emphasizing the floor-to-ceiling height.
It acts as a functional partition between the entry and the living area.
Instead of a solid wall, the bookshelf allows visual permeability, making the entry feel open yet defined.
It provides storage, display, and aesthetic value, reinforcing the welcoming character of the entrance.

SECTIONS

ISOMETRIC VIEWS

This is a modern 3D isometric view of a compact, well-designed apartment layout. The space features an open-plan kitchen and living area, a cozy bedroom, and a separate bathroom, all arranged efficiently. Warm neutral tones, soft lighting, and contemporary furniture create an elegant and inviting ambiance. A balcony with seating and greenery adds a refreshing outdoor extension to the interior.

I created this view to showcase a warm, contemporary apartment layout that balances comfort and functionality within a compact space. It highlights the seamless connection between the living area, bedroom, and bathroom while emphasizing elegant finishes and thoughtful spatial planning.

3D RENDERS

It is a sanctuary of structured elegance—where every shadow has a place and every reflection tells a secret.

ENTRANCE

The focal point is a floor-to-ceiling wooden bookshelf unit with integrated LED warm lighting that highlights the books and decor. It features a unique fluted or slatted glass sliding door in the center, adding a layer of visual mystery and texture.

LIVING AREA

The living area is designed as a contemporary open space, highlighted by curved ceiling details, layered cove lighting, and warm material tones. Neutral upholstery is balanced with dark accents and textured finishes to create depth and visual interest. The render was developed by translating the 2D layout into a detailed 3D model, with careful lighting and material selection to achieve a realistic and inviting atmosphere.

The living area is shaped by gentle curves and layered light, allowing the space to breathe with warmth and continuity. Precise 3D modeling and controlled material detailing transform the plan into a realistic scene that balances comfort, depth, and contemporary character.

BEDROOM

A modern luxury bedroom with warm neutral tones, soft layered lighting, and elegant textures. It blends comfort and sophistication through sleek furniture, ambient ceiling lights, decorative wall panels, and a cozy, hotel-style atmosphere.

The bedroom is envisioned as a quiet, cocooned retreat, where soft textures, warm neutrals, and flowing wall patterns create a sense of calm. Layered lighting, curved ceiling details, and carefully modeled furnishings translate the space into a serene, realistic render that balances comfort with contemporary elegance.

A refined modern bathroom designed with a calm, spa-like mood. It combines textured vertical tiles and smooth stone surfaces in warm neutral tones, balanced by matte black fixtures for contrast. Soft recessed and accent lighting highlights the round mirror and clean architectural lines, while the glass shower enclosure and minimalist fittings keep the space open, elegant, and uncluttered.

WASHROOM

BALCONY

A Breath of Elevated Calm

This render depicts a biophilic balcony retreat, designed as a seamless bridge between modern architecture and the natural world. It transforms a functional outdoor space into a private sanctuary for relaxation.

A suspended cradle of wood and light, where the garden climbs the walls to meet the sky. Here, the breeze is caught in slatted shadows, and the world slows to the gentle pace of a swaying seat. It is a verdant exhale above the earth.
